

## REMINDER

To all students

Opportunities to consume alcohol tend to increase during the summer vacation and at the beginning of term, and the following incidents associated with alcohol consumption have been reported.

Accordingly, I would like to remind students to exercise restraint when drinking and to ensure they observe all laws and regulations, both internal and external, and behave in a manner appropriate for students of Tokyo Tech.

Underage drinking is prohibited by law and activities such as chug-a-lug drinking can be life-threatening, and I wish to remind you that you must not engage in such activities.

(Examples of reported incidents)

- Emergency transportation (to hospital) due to acute alcohol poisoning
- Property destruction and injury due to excessive drinking
- Complaints about loud voices, etc. from local residents
- Police cautions regarding public disturbances
